

EDUCATION

B.E CSE - Sri Eshwar College of Engineering CGPA:8.00	2024-2028
HSC – Spark Matric Hr Sec School 91.8%	2023-2024
SSLC – Jaya Vaasavi Matric Hr Sec School 94.6%	2021-2022

INTERNSHIP

Full Stack Developer Intern – CodeHub Nexus 2025

Worked as a Full Stack Developer Intern at CodeHub Nexus, where I designed and developed a role-based job portal using the MERN stack. Implemented secure authentication, recruiter job management, user job applications with resume upload, and real-time application tracking. Gained hands-on experience in building scalable REST APIs, database design, and deployment.

PROJECTS

Face recognition attendance tracking system: 2025

An automated attendance system that leverages face recognition technology to simplify and improve the accuracy of attendance tracking. The system uses OpenCV and Python for real-time facial detection and recognition, enabling quick and precise identification. It features a user-friendly interface to capture and manage attendance data, with secure database integration for storing records and generating reports. Key features include handling varying lighting conditions, efficient biometric verification, and seamless attendance automation for educational and workplace environments.

Smart Voting System: 2024

A secure smart voting system designed to verify voter identity through fingerprint authentication linked with Aadhaar data, ensuring transparency and preventing electoral fraud. The system authenticates each voter biometrically before allowing them to cast their vote, eliminating duplicate or false entries. Built with a focus on security and accessibility, the project integrates biometric sensors, a centralized voter database, and real-time validation to streamline the voting process. Key features include Aadhaar-based verification, tamper-proof authentication, and a user-friendly interface for efficient vote casting.

JobConnect – Role-Based Job Portal Platform 2025

Built a full-stack job portal using React, Node.js, Express, MongoDB, supporting user and recruiter roles. Implemented secure authentication with JWT, recruiter-only job posting and management, user job applications, resume upload using Multer, and real-time application tracking. Deployed backend on Render and integrated REST APIs with protected routes and role-based access control.

ACHIEVEMENTS

Leetcode : Solved 100+ problems | [link](#)
Skill Rack : Solved 700+ problems | Received 9 certificates | 90+ Bronzes | [link](#)

CERTIFICATIONS :

Python for Everybody Data	Meta	2025
Structure using C and C++	Udemy	2025
React - The complete guide	Udemy	2025

SKILLS

Programming	C C++ Python JAVA
Core Concepts	Data Structures & Algorithms (DSA) Object-Oriented Programming (OOP) DBMS REST API Design Authentication & Authorization
Web Technologies	HTML CSS JavaScript React.js Node.js Express.js
Databases	MongoDB Mongoose Schema Design CRUD Operations
Backend & Security	JWT Authentication Role-Based Access Control Multer (File Uploads) API Security
Tools & Platforms	VS Code Git GitHub Postman Render (Deployment) Axios Jupyter Notebook Canva
